

## **ARABAMBI BABATUNDE**

**Write a brief essay about the best leader you have met or worked with, highlighting the key lessons learned from their lifestyle and leadership skills.**

### **Leader: Mr Peter Gregory Obi**

Although I know him from afar, I see the seven cultures expected of us by Septa in him. In a country where discipline, diligence, and co are missing he stood out and still maintains these values: Discipline, Diligence, Accountability, Respect, Integrity and Resilience.

It is hoped a lot of us can emulate this kind of leaders even though he is not the only one so we can make this country better and the best of it kind.

Just like the head is important to the body, a good leadership is indispensable in the progress and well being of a country. And I strongly belief this country will stand shoulder to shoulder with any great country today if we can get our leaders right and every follower too can be up and doing.
